DETAILED ACTION

EXAMINER'S AMENDMENT

The application has been amended as follows: Claims amended as follows

Claim 1 [Currently Amended] A support apparatus comprising: a first member in a first orientation having a first portion and a second portion; a second member, separate from the first member, in a second orientation inverted from the first orientation, the second member being identical to the first member, and having a first portion and a second portion; the first portions of the first and second members being spaced apart; and the second portions of the first and second members including overlapping interlocking sections such that the first and second members are interconnected and form an interlocking continuous double-walled reinforcing member, wherein the first portions of each member include a span and the second portions of each member include a rib.

Claim 3 [Cancelled]

Claim 8 [Currently Amended] A computer comprising: a chassis; and a support member mounted in the chassis, the support member including: a first member in a first orientation having a first portion and a second portion; a second member, separate from the first member, in a second orientation inverted from the first orientation, the second member being identical to the first member, and having a first portion and a second portion; the first portions of the first and second members being spaced apart;

Art Unit: 2841

and the second portions of the first and second members including overlapping interlocking sections such that the first and second members are interconnected and form an interlocking continuous double-walled reinforcing member, wherein the first portions of each member include a span and the second portions of each member include a rib.

Claim 10 [Cancelled]

Claim 12 [Currently Amended] An information handling system comprising: a chassis; a microprocessor mounted in the chassis; a storage coupled to the microprocessor; and a support member mounted in the chassis, the support member including: a first member in a first orientation having a first portion and a second portion; a second member, separate from the first member, having a first portion and a second portion, the second member being identical to the first member and being in a second orientation inverted from the first orientation; the first portions of the first and second members being spaced apart; and the second portions of the first and second members including overlapping interlocking sections such that the first and second members are interconnected and form an interlocking continuous double-walled reinforcing member, wherein the first portions of each member include a span and the second portions of each member include a rib.

Claim 14 [Cancelled]

Allowable Subject Matter

Claims 1,2,4-9,11-13,15-21 allowed.

The following is an examiner's statement of reasons for allowance: There is simply no evidence in the prior art teaching a first member in a first orientation having a first portion and a second portion; a second member, separate from the first member, in a second orientation inverted from the first orientation, the second member being identical to the first member, and having a first portion and a second portion; the second portions of the first and second members including overlapping interlocking sections such that the first and second members are interconnected and form an interlocking continuous double-walled reinforcing member, wherein the first portions of each member include a span and the second portions of each member include a rib, furthermore there is no evidence in the prior art making these limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
